LinkedIn: [linkedin.com/in/abinaya-lt](https://www.linkedin.com/in/abinaya-lt)

### Objective

Independent, task-driven and seasoned front-end developer with 5 years experience' specialising in developing Responsive Web Applications. Passionate about user experience and proactive in identifying chances to enhance that. Seeking an opportunity to utilise advanced technical skills in developing quality rich Web applications.

### Education

**B.E in Computer Science and Engineering**  
*Avinashilingam University*

*Coimbatore, India*  
*(Aug 2013 - Apr 2017)*

### Experience

**Front-End Developer**  
*Zoho Corporation*

*Chennai, India*  
*(Jul 2017 - Apr 2022)*

### Professional Experience

- Experienced in HTML5, CSS3, Sass, JavaScript, jQuery, AJAX and JSON using RESTful APIs in Agile/scrum environment.
- For Codebase management and maintenance, used GIT version control system from bug fixes to complex features.
- Have worked with Zoho Office Suite applications for documentation, presentation, task management and more.
- **Project IAM: (Identity Access Management)**
  - Developed web applications that are responsive and cross-browser compatible in IAM project with 50+ core features for 5 years.
  - Worked in few important modules including setting up MFA modes (Multi-Factor Authentication), managing a user's primary and secondary login options, managing a user's third-party accounts associated with Zoho and many more.
  - Created a Modal View for users who are admins, enabling them to manage various services of the organisation.
- **Project API Console:**
  - Independently developed a Single Page Application, Zoho API Console, based on OAuth 2.0 framework for third-party applications to gain delegated access to protected resources in Zoho.
  - The developed SPA with a single container for managing data by CRUD operations and Modal Form views for generating OAuth client credentials, thus providing an application with engaging user experience.
  - Worked with RESTful APIs for accessing and managing source data.

- Have created and written various components and functionalities in the global scope files, for reusability and feasible development in the future.
- Migrated a set of CSS files of web applications to Sass files without comprising the style and reducing the lines of code.
- Actively participated throughout the software development cycle right from project requirements to application deployment and maintenance.

## Responsibilities

- Served as Scrum Master to my team for managing and regulating all UI requirements collaborating with different teams and following up with the tasks, for 14 months.
- Created non-technical contents of workflow of every feature developed, to enable non-technical teams to function at ease.
- Collaborated with UX designers, back-end developers, technical writers effectively to output a more robust & complete product and suggest changes wherever required to enhance user experience.
- Actively searched for chances to improvise user experience by enhancing the design of various UI components.
